FREE PROTOCOL

THE 7-DAY FOCUS PROTOCOL

A science-backed daily system to sharpen focus, boost energy, and perform at your peak — every single day.

WHY YOUR FOCUS IS BROKEN

Modern life is designed to steal your attention. The average person checks their phone 96 times per day. Notifications, social feeds, and endless content have rewired our brains to crave distraction over depth.

The result? Shallow work. Low output. Constant mental fatigue. A feeling that the day slipped by without anything meaningful getting done.

This 7-day protocol is designed to systematically rebuild your focus — one day at a time — using neuroscience-backed techniques that require no equipment, no supplements, and no willpower.

Each day introduces one new practice. Stack them over 7 days and you will have a complete focus system running on autopilot.

 MORNING ANCHOR

SUNLIGHT FIRST.

Go outside within 10 minutes of waking. No sunglasses. 10 minutes of direct morning sunlight sets your circadian clock — triggering the hormonal cascade that determines your energy, mood, and focus for the entire day.

YOUR TASK TODAY

Step outside within 10 minutes of waking. Stand or walk for 10 minutes. Face toward the sun (not directly at it). No phone. No sunglasses. Just light and air.

DURATION

10 min

DIGITAL BOUNDARY

NO PHONE FIRST HOUR.

Checking your phone first thing floods your brain with dopamine and cortisol before it is even fully awake. This puts you in reactive mode for the rest of the day — responding to others instead of creating your own agenda.

YOUR TASK TODAY

Keep your phone in another room for the first 60 minutes after waking. Use this time for sunlight (Day 1), hydration, movement, or journaling. Own your morning before the world gets access to you.

Pro tip: Put your phone charger in a different room the night before. This removes the temptation completely.

 DEEP WORK

YOUR FIRST 90-MIN BLOCK.

Your brain peaks in cognitive performance 2–4 hours after waking. This is your single most valuable window of the day. Most people waste it on email and meetings. High performers protect it for their most important work.

YOUR TASK TODAY

Block 90 minutes on your calendar this morning. Write one sentence: what will you complete in this block? Phone in another room. No music with lyrics. One task. Full focus. Set a timer and begin.

DO

One task. Timer on. Door closed. Water bottle ready.

DO NOT

Check email, answer calls, or multitask. The block is sacred.

 BREATHWORK

BOX BREATHING METHOD.

Controlled breathing directly modulates your nervous system. Box breathing — used by Navy SEALs and elite athletes — activates the parasympathetic system, lowers cortisol, and creates instant mental calm and clarity.

THE TECHNIQUE

1. Inhale for 4 seconds
2. Hold for 4 seconds
3. Exhale for 4 seconds
4. Hold for 4 seconds

Repeat for 5 minutes before your deep work block.

Do this immediately before your 90-min deep work block for maximum effect. It primes your brain for sustained attention.

 METABOLISM

KILL THE AFTERNOON CRASH.

The 3PM energy crash is not inevitable — it is a blood sugar crash. When you eat high-carb lunches, glucose spikes and then crashes, taking your focus with it. The fix is simpler than you think.

THE PROTOCOL

1. Eat protein and fat first at every meal — before any carbs.
2. Take a 10-minute walk after lunch — this blunts the glucose spike by up to 30%.
3. Delay caffeine until 90 minutes after waking — prevents the afternoon crash.

Your task: implement the post-lunch walk today. Even 5 minutes helps. This one habit changes your afternoon energy permanently.

6

 SLEEP STACK

BUILD YOUR SLEEP RITUAL.

Everything we have done this week is amplified by quality sleep. 70% of your brain restoration, memory consolidation, and cellular repair happens while you sleep. Tonight, build the ritual.

THE WIND-DOWN STACK (60 MIN BEFORE BED)

-  Phone in another room
-  400mg magnesium glycinate
-  Cool room to 18–20°C
-  Blackout curtains or sleep mask
-  Read a physical book for 20 min

Consistency is the key — same bedtime, same wake time, every day. Your circadian rhythm is a machine. Train it.

 STACK IT ALL

YOUR FULL DAILY SYSTEM.

Today you run the complete protocol. Stack every practice together for the first time and feel the compounded effect.

THE COMPLETE DAILY PROTOCOL

- ☀️ Wake → Sunlight within 10 minutes (Day 1)
- 📵 No phone for first 60 minutes (Day 2)
- 🧘 5 min box breathing before work (Day 4)
- 🕒 90-minute deep work block (Day 3)
- 🍖 Protein first + 10 min post-lunch walk (Day 5)
- 😴 Wind-down ritual 60 min before bed (Day 6)

This is your new baseline. Do this for 30 days and your brain will feel like a different machine. You earned it.

@biohackbuilder

YOU MADE IT. ⚡

OPTIMIZE. BUILD. DOMINATE.

You now have a complete, science-backed focus system. Run it daily for 30 days and watch what happens to your energy, output, and clarity.
